

Product Design for the Environment (DFE)

Chapter 12

ACROSS

- _____ is a design approach to reduce the overall human health and environmental impact of a product, process or service, where impacts are considered across its life cycle.
- _____ identifies the requirements products and their ingredients must meet to earn the Safer Choice label.
- _____ is a technique to assess environmental impacts associated with all the stages of a product's life from cradle to grave.

DOWN

- _____ is Management philosophy that aims at minimizing ecological damage while maximizing efficiency of the firm's production processes, such as through the lesser use of energy, material, and water, more recycling, and elimination of hazardous emissions or by-products.
- _____ care refers to health care, not only of patients in the final hours or days of their lives, but more broadly care of all those with a terminal illness or terminal disease condition that has become advanced, progressive and incurable.
- _____ means for pollutants considered harmful to public health and the environment. The Clean Air Act identifies two types of national ambient air quality standards.
